# **Laramie County Abstract**

Laramie County is the most populous county in Wyoming with an estimated population of 100.984 residents, and is home to the state capitol, Cheyenne. The county is located in the southeast corner of Wyoming and borders Colorado and Nebraska. The racial and ethnic composition of Laramie County's population in 2023 was estimated by the Census Bureau to be 91.4% White, 2.5% Black, 1.4% Asian, 1.3% American Indian/Alaska Native, and 0.1% Native Hawaiian/Other Pacific Islander. Persons of Hispanic ethnicity (any race) comprised 15.8% of the county's population. The median income of the county (\$76.282) is higher than the rate in the United States; however, 10.2% of residents live below the federal poverty line. Based on the Robert Wood Johnson Foundation County Health Rankings, Laramie County is faring about the same as the average county in Wyoming for Health Outcomes. Part of this ranking is a result of Laramie County's high rates of suicide (30.6 per 100,000), teen births (22 per 1,000), excessive drinking (16%), alcohol-impaired driving deaths (36%), and smoking (15%) among other outcomes. Laramie County is a politically conservative area, much like most of Wyoming. Though the high rates of suicide suggest some level of norm for those who struggle with behavioral health, the rates also elicit immense concern and focus as a priority among the community. Substance use has also been normalized, particularly for alcohol and tobacco, and is prevalent throughout the county. There is high demand for tangible steps toward change including improved prevention training and collaboration between community partners.

2. What are the key prevention needs in the county and how were the prevention needs in the county identified and prioritized?

The prevention needs in the county were identified and prioritized through our Community Health Needs Assessment and Community Health Improvement Plan process led by the Laramie County Community Partnership. Through the voting process, three priorities were selected and subcategorized. The three priorities selected through quantitative and qualitative data collection were neighborhood and physical environment, healthcare system, and economic stability. Within each of these three priority areas, two goals were identified. The Behavioral Health Action Team continues to be involved throughout the CHNA and CHIP process, ensuring we have a collaborative workplan for prevention in Laramie County.

- 3. How will the proposed plan address identified needs?

  Our proposed plan will address the identified needs through our selected evidence-based strategies and collaborative partnerships. The LCCP used the best available data, resources, and capacity to determine how to best address the prevention needs within our county. We believe that our extensive partnerships will facilitate the success of our work plan.
- 4. What key populations have you identified for targeted interventions? Service members, Veterans, and their families, youth, and economically disadvantaged individuals and families.
- 5. How did you identify the key population(s)?

The Behavioral Health Action Team supports strategies that help youth in the community by enhancing protective factors and reducing risk factors. GWBBS provides prevention programming for youth at-risk for using ATODs, as well as those exhibiting depressive symptoms or having life experiences that put them at risk for substance use or misuse. Activities include mentoring, case management, and engagement activities, with anticipated increases in positive youth outcomes. As demonstrated by the Prevention Needs Assessment data from LCSD 81 in 2022, Laramie Country youth are engaging in behaviors that put them at risk. GWBBS implements programming to ensure positive outcomes for youth, including increased school connectedness, decreased effect sixly behaviors, decreased depressive symptoms, or increased protective behaviors. In a national study of the effectiveness of BBBS, youth are 46% less likely to initiate drug use, 27% less likely to initiate alcohol use, and 33% less likely to hit someone. This programming will impact multiple objectives related to our prevention efforts. Big Brothers Big Sisters served 70 youth it Laramie Country and 61% of the youth were newly enrolled.

The Overdose Patality Review Team was stated in August 2023 in Laramic County. This work uses timely local level data to identify risk and protective factors of indiduals who have fatally overdosed in the county. The team uses this information to identify gaps in the care continuum for people at high-risk of overdose, and develops recommendations to address them. OFR is comprised of over 15 community and governmental organizations who invest time to review and and less recommendations quanterly. Each overdose case is reviewed backlogging to 2022. The community close this strategy because it is rooted in evidence and was a practical fit.

## Overview

The Wyoming Department of Health, Public Health Division (WDH-PHD) is accepting applications from Wyoming Counties for the Community Prevention Grant (CPG) program. The program addresses some of Wyoming's top public health prevention priorities (underage alcohol, youth marijuana use, adult overconsumption of alcohol, tobacco use, opioid/prescription drug misuse/abuse and other drugs, and suicide). These grants provide opportunities and additional resources to counties to implement data-driven and evidence-based substance abuse and suicide prevention plans that positively impact substance use and mental health. Funded applications will result in a grant award agreement (contract) with the WDH-PHD from July 1, 2024, through June 30, 2026.

WDH-PHD is expecting to fund the SFY 25/26 CPG program through Federal Funds (~53%), State General Funds (~25%), and Tobacco Settlement Funds (~22%). As final amounts of funding sources are currently unknown, minor changes to the percentages of funding sources may be updated and will be communicated with the counties. The total amount of funding available to Wyoming counties through the CPG program is \$8 million.

## Eligibility

Only Wyoming County Governments are eligible to apply for this funding.

### Purpose

Community engagement is an essential component of an effective and equitable prevention system. Substance use, nicotine, and suicide affects all Wyoming communities. Many factors influence a person's chance of developing a mental and/or substance use disorder. Effective prevention focuses on reducing those risk factors, and strengthening protective factors, that are most closely related to the problem being addressed (SAMHSA). Identifying shared risk and protective factors across the areas of the Community Prevention Grant work allows community partners to ground their efforts in a common framework (Shared Risk and Protective Factors Model).

### Substance Use Prevention

Substance use is associated with a wide range of health and social problems. Given the impact of substance use on public health and the increased risk for long-term medical consequences, it is critical to prevent substance use from starting. Preventing or reducing early substance use initiation, substance misuse, and the harms related to misuse requires the implementation of

effective programs and policies that address substance misuse across the lifespan (Surgeon General's Report).

### Nicotine Prevention and Control

Smoking is the leading preventable cause of death in the United States. In Wyoming, smoking leads to approximately 800 deaths from smoking-related illnesses each year and nearly \$258 million in annual healthcare costs (CDC). The Surgeon General declared vaping an epidemic among youth and young adults in 2018.

### Suicide Prevention

Wyoming has had one of the highest suicide rates in the country, historically double the national average. The frontier landscape provides challenges for accessing quality mental health care and increases social isolation. Nearly 70% of suicide deaths involved a firearm, and the most suicide deaths occur among white middle aged males (however females typically attempt suicide at a higher rate). Populations that are disproportionately affected include American Indians, the LGBTQI+ community, service members, and veterans. To prevent suicide attempts and deaths in Wyoming, community action is needed to create a sense of belonging, destigmatize mental health struggles, reduce access to lethal means, and improve access to resources.

## Community Prevention Goals

- Reduce the percent of Wyoming high school students <u>reporting</u> alcohol use in the past 30 days and reduce the percent of Wyoming high school students <u>reporting</u> marijuana use in the past 30 days
- 2. Reduce the percent of Wyoming adults <u>reporting</u> consuming 5 or more drinks (4 or more for females) on an occasion at least once in the last 30 days
- 3. Reduce the <u>rate</u> of all drug involved overdose deaths through primary prevention efforts
- 4. Reduce the percent of employed adults <u>reporting</u> exposure to secondhand smoke at their workplace and the number of adults reporting exposure to secondhand smoke in public places, indoors and outdoors
- Reduce the percent of adults currently using nicotine/tobacco measured by the percent of adults <u>reporting</u> any tobacco use and the percent of adults reporting current e-cigarette use
- Reduce the percent of Wyoming high school students <u>reporting</u> having vaped in the past 30 days
- 7. Reduce the suicide rate in Wyoming
- 8. Strengthen protective factors and reduce risk factors that impact substance use and mental health outcomes

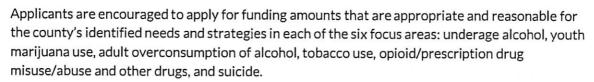

## **Award Amounts**

Funding will be allocated to counties as shown below. Each county will receive a base amount of \$157,500. The remaining funds will be allocated based on county population using the 2022 census data. Previously, 2020 population information was used to determine funding allocations.

## Strategic Prevention Framework Partnerships for Success (SPF PFS)

Wyoming is one of five states that receives the SPF PFS 2020 competitive grant. Wyoming's application for funding targeted preventing youth marijuana use and underage drinking and allocated funds based on final scores of a needs assessment that ranked counties based on prevalence data and number of people affected with the following goals:

Goal 1: Increase capacity and infrastructure of Wyoming's prevention system to support youth substance use prevention by raising the average overall capacity score from 3 to 4 by June 30, 2025.

Goal 2: Community Prevention Grantees will reduce rates of underage drinking among 12-20 year olds and meet identified short-term and intermediate outcomes and objectives as measured by a change in rates and other established criteria by June 30, 2025.

### SPF PFS Funding Allocations

Counties should budget funding for the amount listed in Table 2 between underage alcohol use, youth marijuana, and capacity enhancement. It is important to note that personnel time spent working on underage alcohol use and youth marijuana use can be included as part of the budget. A budget estimate for the funds allocated to SPF PFS activities can be found on the work plan Instructions & Summary tab using an estimated 25% of personnel effort. This grant ends August 30, 2025.

## Expectations

To meet the goals of the CPG program, grantees should use the funding to support the expectations identified below. The list below does not include all grant expectations.

\*Denotes federally funded required activities

#### Assessment:

- Use county-level data and state level data to assess needs and identify risk and protective factors and appropriate evidence-based strategies for each of the six focus areas and capacity enhancement.\*
- Use data to select a population disproportionately affected by each focus area.\*

### Work plan:

- Collaborate community prevention activities with a community coalition that uses the Strategic Prevention Framework (SPF) process to develop the work plan.
  - The SPF represents a five-step, data-driven process used to: assess needs (Step 1); build capacity (Step 2); engage in a strategic planning process (Step 3); implement a comprehensive, evidence-based prevention approach (Step 4); and evaluate the implementation and related outcomes (Step 5). The use of the SPF process is critical to ensuring that communities work together to use data-driven decision-making processes to develop effective prevention strategies and sustainable prevention infrastructures.\*
- Identify evidence-based strategies (EBS) for substance use, tobacco, and suicide prevention services and activities. The term evidence-based refers to whether the intervention has evidence from research or evaluation, showing that it is effective under a particular set of circumstances.\*
  - The CPG Risk and Protective Factor and EBS List have been made available with this application. The State Epidemiology Outcomes Workgroup (SEOW) evidence-based subcommittee is available to review any strategies that a county would like WDH-PHD to consider that are not included on this list. A strategy may be considered evidence-based if it fulfills one of the following three conditions:
    - It is included in a federal government register of evidence-based interventions
    - It is reported in peer-reviewed journals (with positive effects on the primary targeted outcome).
    - When no appropriate interventions are available through the first two primary resources on evidence-based interventions, then

community prevention specialists may identify other sources of evidence and coordinate with WHD-PHD for relevance.

 Work plan must be detailed with culturally appropriate policy, systems, and environmental (PSE) strategies and activities which seek to improve health equity.

## **Application Requirements**

The Biennium 25/26 application will be submitted through an online survey: <a href="https://redcap.link/bpbiwuce.">https://redcap.link/bpbiwuce.</a>

All pieces must be complete before submitting. Below are the questions that will be asked on the survey.

### A. Contact Information

- 1. County-Level Grant Manager

- 2. What are the key prevention needs in the county and how were the prevention needs in the county identified and prioritized?
- 3. How will the proposed plan address identified needs?
- 4. What key populations have you identified for targeted interventions? Examples may include pregnant women/teens, service members, veterans and their families, economically disadvantaged, and LGBTQ+
- 5. How did you identify the key population(s)?

### C. Work Plan/Budget

Through a collaborative effort with one or more local coalitions focused on substance use prevention and suicide prevention, complete logic models for the five focus areas: underage alcohol and youth marijuana use, adult overconsumption of alcohol, tobacco use, opioid/prescription drug misuse/abuse and other drugs, and suicide. Capacity enhancement efforts should be included with the strategy that it supports. Several evidence-based risk and protective factors have been identified through prioritization using data analysis at the state level and should be used to guide county level efforts. Logic models should then be used to complete the detailed work plan and budget. The work plan/budget template will be shared as a Google Sheet workbook provided along with this document. Use of the template is required for the application.

The work plan should include evidence-based strategies to address each of the four nationally recognized tobacco prevention and control goals outlined in the <u>CDC Best Practices for Comprehensive Tobacco Control Programs</u> and strategies that align with the <u>national</u> and state suicide prevention goals. Include the following components in the work plan for tobacco prevention and control:

- Strategies to reduce disparity related to tobacco use, dependence, and secondhand smoke in the selected population.
- Provide training opportunities.

Strategies have been identified based on risk and protective factors and are available through a drop-down menu on the work plan/budget template. An associated "CPG Risk and Protective Factors and EBS List" is included with this application that provides additional details regarding these strategies. Strategies in the work plan must be culturally appropriate policy, systems, and environmental (PSE) strategies and activities which seek to improve health equity.

Provide a detailed budget and justification for the entire amount of funding requested. Download from Google Sheets into an Excel document to upload with the application.

### Instructions & Summary

This tab is automatically populated with information from the other tabs. This tab provides a summary of expenses. The tab also calculates an estimated percentage of funding budgeted to each focus area to estimate final expenditures falling within the target range as outlined in the application. County can make adjustments to the estimated percentage of time allocated to each focus area, which will update the amount of funding allocated to each focus area.

### Requested Budget

Sections A. Personnel, B. Equipment and Supplies, C. Operational Supports, D. Website and Social Media/Community Presence, E. Community Coalitions and Workforce Development, and G. Indirect Costs will be requested on this tab. Section F. Community Prevention Service Implementation will populate from the other tabs.

- A. Personnel List all staff for whom you are requesting salary reimbursement in this section. Please provide detail in justification regarding calculation of fringe benefits.
- B. Equipment and Supplies List estimated equipment and office supply expenses.
- C. Operational Supports List estimated operational expenses such as office space, internet, phone, and subscriptions.
- D. Website and Social Media/Community Presence List estimated expenses to maintain a website and social media/community presence. Media expenses not directly tied to a prevention strategy should be listed here. Expenses for this category should not exceed 10% of your budget, justification will need to be provided for anything over 10%. Please note WDH-PHD maintains a <u>Social Media Toolkit Calendar</u> with free assets as well as a <u>Social Media Toolkits</u> and Shareables resource.
- E. Community Coalitions and Workforce Development List estimated expenses related to managing the community coalition to include food and travel expenses for meetings. Include estimated expenses for the Annual CPG Fall Summit to Casper and any of the optional in-person meetings if planning to attend. Conferences that cannot be directly tied to a strategy should also be listed here.
- F. Community Prevention Services Implementation Will populate when other tabs are completed.
- G. Indirect Costs List the percent of indirect costs you would like to claim in column F 81. Indirect costs cannot be more than 10%.

### Focus Areas

Complete the logic model and associated strategy budgets for each focus area. Reach out to WDH-PHD if you need additional strategy or budget lines.

### Complete Logic Model

Logic models should be completed in coordination with the local prevention coalition utilizing the strategic prevention framework.

Risk/Protective Factors - Evidence-based risk and protective factors have been identified and included using data as summarized in the CPG Risk and Protective Factors and EBS List (List). Risk and protective factors associated with the focus area are available via drop down to include in the logic model. Coalitions should prioritize risk/protective factors based on importance and changeability factors in their community. Details on the prioritization should be provided under community conditions.

<u>Note:</u> We acknowledge that strategies should be chosen that target multiple, not single risk/protective factors. For the purposes of this application, please pick the factor with the highest importance and changeability factors for your community. We encourage you to maintain a separate logic model which includes more detail than is provided in this work plan.

Data Indicator - Write a data indicator statement that connects to the risk/protective factor chosen. The source of the data should be included in the statement. Potential data indicators for each risk/protective factor can be found on the <u>List</u>, although you are not limited to those data indicators alone.

**Strategy** - Potential evidence-based strategies have been identified for each risk/protective factor and can be found on the <u>List</u>. All identified strategies are available via drop down. Coalitions should choose strategies based on the evidence-based foundation, practical fit, and conceptual fit for their community. Details on the choice of strategy should be provided under community

conditions. All strategies that the Community Prevention Specialist spends time implementing should be included in the work plan, even if there is not an associated budget.

Note: Strategies should be listed in only one focus area. Pick the one that most closely aligns with the purpose of the chosen strategy.

Process Measures/Outputs - Write a process measure/output statement that connects to the strategy chosen. This will often be what will be entered into the Prevention Reporting & Evaluation System (PRES) in <a href="REDCap">REDCap</a> when the strategy is implemented. Be sure you pick something that is measurable and plan ahead to ensure you track the process measure/output. This will become part of the automatically generated evaluation statement.

Short-Term Outcome - Write a short-term outcome that expresses the change you expect to see as a direct result of the strategy to the data indicator. When possible, short-term outcomes should be written in the following format, "To increase/decrease (risk and protective factor) by (how much), by (when, as measured by (indicator). This will become part of the automatically generated evaluation statement.

**Long-term Outcome** - Long-term outcomes are the overall goals of the Community Prevention Grant Program and are included for you.

### Work Plan Budget

Budgets should be completed for each strategy.

Target Population Level (IOM) - Select the target population level Institute of Medicine (IOM) category for each strategy. This will be used for federal reporting purposes and is not required for nicotine or suicide budgets.

Universal Direct: Interventions directly serve an identifiable group of participants but
who have not been identified on the basis of individual risk (e.g., school curriculum, after
school program, parenting class). This also could include interventions involving
interpersonal and ongoing/repeated contact (e.g., coalitions).

- Universal Indirect: Interventions support population-based programs and environmental strategies (e.g., establishing ATOD policies, modifying ATOD advertising practices). This also could include interventions involving programs and policies.
- Selective: Selective prevention strategies target subsets of the total population that are deemed to be at risk for substance abuse by virtue of their membership in a particular population segment—for example, children of adult alcoholics, dropouts, or students who are failing academically. Selective prevention targets the entire subgroup regardless of the degree of risk of any individual within the group.
- Indicated: Indicated prevention strategies are designed to prevent the onset of substance abuse in individuals who do not meet Diagnostic and Statistical Manual of Mental DIsorders (DSM-IV) criteria for addiction, but who are showing early danger signs, such as falling grades and consumption of alcohol and other gateway drugs. Indicated prevention approaches are used for individuals who may or may not be abusing substances, but exhibit risk factors that increase their chances of developing a drug abuse problem. Indicated prevention programs address risk factors associated with the individual, such as conduct disorders, and alienation from parents, school, and positive peer groups. Less emphasis is placed on assessing or addressing environmental influences, such as community values.

**Description** - Enter a brief description of strategy implementation. This will be included by WDH-PHD into the CPG Budget Summary on REDCap.

Community Conditions - Briefly discuss the community conditions that lead to the decision to implement the chosen strategy. Consider community capacity (resources and readiness, prioritization of risk/protective factor, and importance and changeability), and how the strategy is a practical and conceptual fit for the community.

**Evaluation Statement** - This will be populated from the logic model above.

Purchase Items - Complete with necessary detail to understand what is being requested and purchased. When appropriate, indicate contract and subrecipient relationships in the description. Promotional items should be a separate line item and easy to identify. All expenses should meet the expectations and allowability guidelines as set forth in this application document.

Budget Justification - Provide additional detail that will be helpful to support the requested expenses or to provide additional information that doesn't fit in the purchase items table.

Example work plan/budget template can be found on the CPG Team Site.
