**NO RIPPER?
NO PROBLEM!**
Walk 'n' Roll Parallel Lift, Lift Assembly

The Walk 'n' Roll Heavy Duty Lift Assembly attaches to the motor grader like a factory rear ripper. It uses the same bolt pattern so there is no welding or holes to drill to mount the lift assembly. The lift assembly requires an extra valve and hydraulics to the rear of the motor grader. Parallel lift raises and lowers the front and rear tires simultaneously assuring equal pressure on all of the tires.

The Accumulator and Quick-Attach are standard on the Walk 'n' Roll Lift Assembly. The Quick-Attach allows easy on - easy off of the grader. It's a one man operation.

Quick-Attach

Ripper Receiver

The Quick-Attach is optional for ripper mounted packers. The Quick-Attach brackets are mounted on the Walk 'n' Roll packer and the ripper receivers are loose and can be manually placed in the ripper pocket.

OPTIONAL ACCUMULATOR

The Accumulator will provide four and one-half inches of compression for precise control of down pressure while compacting. This feature will prevent bridging and eliminate unnecessary tire wear.

Del Olson, Road Foreman, Dunn County North Dakota accepts delivery of their Thirteenth (13) WR90 Walk 'n' Roll Oscillator packer/roller.

Dunn County did own Five Canadian built packers and has since traded them off for the more reliable, better compaction Walk 'n' Roll packer/rollers.

Dunn County is in the Bakken Oil field and their roads take a beating from the heavy truck traffic. Del says, "They couldn't keep up with their road maintenance without the Walk 'n' Roll packers."
