Application Questions [top](#)

1. Organization Type

- ☐ State Government
- ☒ County Government
- ☐ City/Town Government
- ☐ Tribal Government
- ☐ School District
- ☐ Hospital District
- ☐ Institution of Higher Education
- ☐ Other Special District
- ☐ Other

2. What cybersecurity framework does your organization subscribe to and how far along are you in implementing that framework?

Laramie County uses NIST Cybersecurity Framework that is fairly mature in its implementation within the county. We also use CIS controls and which has been intermediately implemented into our system.

3. Please briefly describe the cybersecurity project.

Darktrace is a security solution that delivers preventive and live threat detection. Darktrace can take both preventative measures to protect against potential threats as well as automatically block any actively detected intrusions. It can provide a response plan for the proper recovery steps needed if we do get hit with a malicious attack. Finally, it can take additional logs from other security sources, aggregate those logs with its own logs and provide a holistic view of threats or intrusions.

Currently, we are not well equipped to analyze logs to look for vulnerabilities and potential malicious activity. It would take hours upon hours to look through logs from multiple solutions and then try to correlate any questionable logs into a clear picture of action. Darktrace will combine these logs and provide automatic and real-time analysis and protection of those threats quickly and with minimal man hours increasing our efficiency.

4. SLCGP projects must align with one of the 4 following objectives. Objective 1: Develop and

establish appropriate governance structures, including developing, implementing, or revising cybersecurity plans, to improve capabilities to respond to cybersecurity incidents and ensure continuity of operations. Objective 2: Understand current cybersecurity posture and areas for improvement based on continuous testing, evaluation, and structured assessments. Objective 3: Implement security protections commensurate with risk. Objective 4: Ensure organization personnel are appropriately trained in cybersecurity, commensurate with responsibility.

Which objective does the project align with?

- ☐ Objective 1
- ☒ Objective 2
- ☐ Objective 3
- ☐ Objective 4

5. How does the project impact or support your local cybersecurity efforts?

Cybersecurity and secure networks are a continuing concern that has been identified. This cybersecurity project will protect county systems to include information and services. Darktrace will allow sensitive information to be secure from damage, unauthorized use and exploitation along with providing twenty-four hour protection. It is imperative that Laramie County has the best protection we can obtain as many other agencies such as law enforcement, EMA and the Health Department also use our system.

Securing Laramie County data is one of the highest job functions that the Information Technology Department does. In a world of quickly advancing technological changes, it is imperative Laramie County keeps up to date with the most current software so protected data is not easily breached by today's hackers. The Laramie County Emergency Response Plan along with the Laramie County Cybersecurity Plan have identified backup and data/resource availability in being a critical aspect of cyber and emergency readiness. Robust protection has been identified in several round table discussions as the best recovery option for terrorist and cyber attacks.

6. Does the project protect critical infrastructure? If so, please describe the infrastructure and how this project will impact it.

Our current solution is being pushed to capacity and no longer meets our needs for current cyberspace standards. Our existing solution is also not a high availability pair, so if it goes offline, our critical services and information also go offline. Our request would identify and block all unwanted traffic to include terrorist threats to county government. Having a robust software that protects all of Laramie County's information and detects and disarms harmful data breaches is essential for protecting Laramie County security.

Darktrace can be used for audits, testing, evaluating, and assessing cybersecurity postures by leveraging its AI-powered threat detection capabilities. It can simulate real-world attacks, identify and respond to possible threats, and provide insights into network traffic and potential vulnerabilities. Darktrace can increase our independent efforts by providing real-time detection and response capabilities. It can also be used to test human risks with simulated phishing emails.

7. Continued federal funding and ongoing support is not guaranteed. Do you have local support and/or funding to continue the project beyond the federal funding should it be awarded?

No, we currently do not have any other grant requests for this cybersecurity measure. We did receive SHSP funding two years ago for Firewalls under the umbrella of Cybersecurity.

8. Will you accept partial funding?

No, unfortunately we would need the full amount to implement Darktrace.

9. What date do you anticipate the project to be completed?

Our anticipated completion date is no later than 9/30/2026.

10. Please submit a minimum of three (3) milestones associated with this project.

Milestone 1: We will establish a budget and accounting line items to prepare for receiving the funding. Upon award, the County will work with Darktrace to implement this software into our current system. We anticipate this step will be completed within 6months of our award notice.

Milestone 2: Laramie County will work with Darktrace to train employees and work out any bugs that might arise from the implementation of Darktrace into the current Laramie County system. We anticipate that this step will be completed within 12 months of our award.

Milestone 3: Once Darktrace is in place and functioning, Laramie County can use it to test, evaluate and assess our cybersecurity posture, helping to proactively identify and mitigate threats before they can cause significant damage or data loss.

11. I understand that this is a competitive grant program and that submitting this application does not guarantee funding. The Wyoming Cybersecurity Planning Committee will review applications and make funding determinations. If selected for funding, the Wyoming Office of Homeland Security will contact you to discuss next steps.

Through funding from the Infrastructure Investment and Jobs Act, also known as the Bipartisan Infrastructure Law, the SLCGP enables DHS to make targeted cybersecurity investments in SLT government agencies, thus improving the security of critical infrastructure and improving the resilience of the services SLT governments provide their community. This SLCGP award provides funding in the amount of: \$ \$4,477,270 for the state of Wyoming. Of this amount, up to \$223,864 can be retained by the State Administrative Agency (SAA) for management and administrative expenses, and a total of \$1,119,318.00 is the required cost share.

The terms of the approved Investment Justification(s) and Project Worksheet(s) submitted by the recipient are incorporated into the terms of this Federal award, subject to the additional description and limitations stated in this Agreement Article and the limitations stated in subsequent reviews by FEMA and CISA of the award budget. Post-award documents uploaded into ND Grants for this award are also incorporated into the terms and conditions of this award, subject to any limitations stated in subsequent approvals by FEMA and CISA of changes to the award.
