PIONEERS IN OUR FIELD

A HISTORY OF ACHIEVEMENT

In 1973, J.A. Larue inc. started as a repair shop for various types of heavy diesel equipment. Later, the company specialized in rebuilding used snow removal equipment. Until, that is, founder André Larue had the vision to design and manufacture a snow blower that would stand out and stand up to the worst of winter. Nearly a half century later the company is managed by the second generation, Denis, and Louis Larue. And it has become one of the largest makers of industrial snow removal equipment in the world. Founded and based in Quebec, where snowfall has been known historically to reach up to 5 meters in depth, Larue arose from a culture of snow. Snow isn't weather in Quebec, it's a way of life.

We live it, 4 months a year. And all of that snow has given us an expertise that few others can claim. Our snow removal equipment is a study in continuous refinement, relentless innovation and an ability to deliver highly customized machines to clients around the world. Snow fears Larue. And when it comes to clearing roads, Larue is a name you can count on.

OUR MISSION

To design, manufacture and distribute industrial snow removal equipment for the global market. We're intensely focused on the needs of our customers and aim for complete satisfaction through teamwork and a spirit of innovation.

OUR VISION

To become the world leader in the design, manufacture, and distribution of industrial snow removal equipment. We want to be recognized for our passion and dedication for reliable, efficient service that is appreciated worldwide.

WE'VE BEEN MAKING SNOW REMOVAL EQUIPMENT FOR OVER 45 YEARS. THAT'S A LOT OF EXPERTISE, AND IT'S A LOT OF SNOW OUR BLOWERS PUT IN ITS PLACE. WE'VE SERVED A LOYAL BASE OF AIRPORT, MUNICIPAL, CONTRACTOR AND GOVERNMENT AGENCIES, AND THEY'VE HELPED MAKE OUR REPUTATION, AND OUR PRODUCTS SHINE.

FEATURES & BENEFITS

SAFETY FIRST 1

Every single product in Larue's snow clearing equipment lineup is built and tested with the operator's health & safety top-of-mind. You have a lot at stake in your daily operations and your people are your most valuable assets. Downtime isn't in your vocabulary. That's why we engineer our machines in order to minimize risk and maximize safety. Features like an automatic clutch disengagement system in the event of unit blockage, 2 emergency stop buttons, grooved oversize safety bolts located away from street-side and ground-level maintenance points work together to keep everyone safe.

LIGHTER BUT MEANER

Better design means significant productivity gains, but it also means better engineering with features and benefits like triangular box frame construction, unmatched power-to-weight ratio, and left-mounted radiator location that reduces frosting or blocking. In addition, the impeller & drum are at the center of the unit, facilitating snow processing and reducing lateral overflow. Add to that a center-of-gravity located close to the wheel loader for enhanced stability.

OUTSTANDING PERFORMANCE 2

Larue's unique conveyor and impeller designs allow operators to process more snow, faster. Equipped with Cummins® turbo-diesel engines with output ranging from 134 to 365 horsepower, our units boast a casting distance up to 150 feet. Simply put, we've got the power and capacity you need to take snow out of your way.

RUGGED DURABILITY

Our heavy-duty units are designed to perform relentlessly under extreme weather conditions. Plus, the parts we make, or install have been rigorously tested and solidly built for maximum durability. Heavy-wear parts are machined from abrasion-resistant Hardox®, while still others are engineered from tungsten or chromium carbide, up to 4 times more durable. Larue snow blowers are designed to never let you down.

ULTIMATE PRECISION 3

Experience precision casting with a dense, solid stream and an impressive snow compaction rate. Larue products are all about clearing the roads right the first time, and every time.

SUPERIOR VISIBILITY 4

Built with the operator in mind, our snow blowers' angled hood shape and off-centered chutes offer superior visibility, which in turn reduces operator fatigue, an essential plus for the safety of staff working long shifts. Add to that 4 powerful LED lights and lack of visibility during nighttime operations is simply no longer an issue.

EASE OF MAINTENANCE 5

Larue snow blowers are designed for easy serviceability and simple, lower-cost maintenance because all serviceable components are accessible at ground level. Plus, Larue's transmission-integrated wet-type multi-disc clutch requires no maintenance or periodic adjustments. And off-the-shelf parts reduce lead times and ensure your Larue is back on the road, fast. Convenience is something we've built into our approach, and in our lineup.

OWNING & OPERATING COST

Our machines are engineered to maximize uptime and reduce cost of operation, all of which enhances your ROI. Your budget matters when considering the parts and components for repair or replacement. We build snow clearing equipment, but we're mainly in the business of customer satisfaction via maximum profitability and exceptional service. That way, Larue is top-of-mind when it's time to refresh their fleet. It's a formula that has contributed in no small part to our success for over 45 years. Make it part of yours.

ENVIRONMENT-FRIENDLY

Nearly all our new two-stage models are equipped with a certified Stage V engine, subject to the strictest current emission standards. Larue's unique engine integration design improves fuel economy without compromising performance & reliability.

SAFETY FIRST 1

All of our models are built and tested with the operator's health and safety as our top priority. We understand that you have a lot at stake in your daily operations and that you want to take care of your people. You cannot afford downtime. That's why we designed our snow blowers in a way that minimizes the risk of accidents. Among those design elements are the automatic clutch disengagement system if the unit suffers a blockage, all maintenance points made from the ground and 2 emergency stop buttons to help keep the workers safe.

BETTER BY DESIGN 2

Better design means significant productivity gains, but it also means better engineering with features and benefits like triangular box frame construction, unmatched power-to-weight ratio, and left-mounted radiator that reduces frosting or blocking. Its center-of-gravity is located close to the wheel loader for enhanced stability. It's clear, Larue products are built for performance and designed to last.

RUGGED DURABILITY 3

Our heavy-duty units are designed to perform relentlessly under extreme weather conditions. Plus, the parts we make or install have been rigorously tested and solidly built for maximum durability. Heavy-wear parts are machined from abrasion-resistant Hardox®, while still others are engineered from tungsten or chromium carbide, up to 4 times more durable. Larue snow blowers are designed to never let you down.

OUTSTANDING PERFORMANCE

Larue single-stage snow blowers are powered by a Caterpillar® Tier 4 Final engine. Specialized for snow dump sites, they can blast snow up to 120 feet providing fast, cost-efficient clearing capacity. Delivering up to 1,200 horsepower, these machines are designed to work with ease in the toughest operating conditions. And our innovative optimized conveyor minimizes lateral overflow, reducing the number of passes required to do the job.

HIGH UPTIME, LOW MAINTENANCE

The majority of Larue components are engineered in-house to ensure that your equipment stays on the road, where it belongs. Occasionally you might need to do a maintenance. Again, we've got you covered. Larue single-stage snow blowers are designed for easy serviceability and simple maintenance with all serviceable components accessible from ground level. We also use off-the-shelf parts which reduces lead times ensuring your Larue is back to work, fast.

OWNING & OPERATING COST 4

Our machines are engineered to maximize uptime and reduce cost of operation, all of which enhances your ROI. Your budget matters when considering the parts and components for repair or replacement.
