Laramie County's WYSOS 2022 Physical and Cyber Security Funding Request

2022 Wyoming Secretary of State Physical and Cyber Security Funding Request

This request is being submitted to the Wyoming Secretary of State's Office (WYSOS) for election related physical and/or cyber security improvement funding assistance to the county making application.

Counties requesting WYSOS funding assistance to remedy:

- * PHYSICAL security gaps must commit to implementing the related project no later than July 1, 2022.
- * CYBERSECURITY gaps must commit to implementing the related project no later than December 31, 2022.

If meeting the above implementation dates is not reasonable for your respective project, please reach out to Andrea.Byrne@wyo.gov or via telephone at 307.777.5953 prior to your grant request submission so an appropriate discussion can be had.

6. Are you requesting funding assistance for physical security improvements, cyber security improvements, or both? *

- ☒ Physical Security Improvements
- ☐ Cyber Security Improvements
- ☐ Both

7. If your project involves physical security improvements, please provide information about the physical security gap and how it is being remedied with the funding application.

Please provide plenty of detail!

The Laramie County Clerk's Office is requesting funding to purchase Voter ID barcode scanners for election judges at voter check-in. We are requesting 85 of these for our various polling locations in the county. We would also like to request funding for trailcams for each polling location where equipment is pre-positioned prior to the election. Our request would be for seven. These items would help to further ensure the integrity and security of Laramie County elections. Without this equipment we rely on our election judges to quickly read a license at voter check-in and there is room for human error. The trailcams will allow us to confirm our voting equipment is secure once it has been set up pre-election.

8. If your project involves cyber security improvements, please describe the project and how it mitigates cyber security risks for Wyoming's elections.

Please provide plenty of detail specific to your office, county, and/or the state.

NA

9. How will your project increase the capability or reduce vulnerabilities in protecting, preventing, responding, or recovering from an act of terrorism in relation to elections as critical infrastructure? *

Our project will provide physical security measures to increase the county's ability to ensure proper voting regulations, thus reducing vulnerabilities due to human error or tampering. The physical security measures we will be taking with this project will ensure that election judges accurately read licenses and that the election equipment is protected after initial setup before the election begins. The cameras will also allow the county to monitor volunteers and employees for proper response and recovery associated with any threat related to elections.

10. What is the funding amount you are requesting? *

IMPORTANT: Supporting documentation such as quotes or bid information must be submitted to Andrea.Byrne@wyo.gov and must reflect the amount being requested.

\$41,775 We are requesting \$40,375 for 85 ID scanners and 7 trail cameras at \$200 each for a total of \$1,400. Quotes are being emailed right after grant applications submittal.

11. On what date do you anticipate the project to be completed? *

REMINDER: If it is a physical security project, you must complete the project by July 1, 2022. If it is a cyber security project, that must be completed by December 31, 2022.

MM DD YYYY

06 / 30 / 2022

12. Milestones: Please submit a minimum of three (3) milestones associated with this project if funding is approved. *

Milestones should represent a logical progression of the project to allow for realistic monitoring and management. Please include target dates for completion of each milestone. A milestone cannot be something which has already occurred.

1. Upon award, we will request updated quotes to move forward with the purchase of ID scanners and trailcams. We anticipate being able to move forward with this milestone upon funding and would need approximately one month for completion.

2. We will contract with selected vendors for the ordering/installation or training associated with the equipment. We anticipate this take one to two months for completion.

3. Finalize and closeout grant funds by 6/30/22 with all components of the project being 100% complete.

13. Are you currently utilizing, or have you utilized, any of the free DHS election cyber security services? *

IMPORTANT: A response of "No" could jeopardize your funding request.

We are members of the following: EI-SAC, MSI-SAC, US CERT Mailing List, we receive emails from the local fusion center, SISA participation, and participation in the DHS audit as well as various trainings and conferences that have been made available.

Capture it all with the DS4608

No matter what kind of data you need to capture in your store, there is a DS4608 model that is ready for the job. Scan 1D and 2D barcodes, whether they're printed on a label or displayed on a phone. Capture DotCode and dotted DataMatrix barcodes through cellophane, as well as the tiny and dense barcodes found on jewelry tags. Read wide barcodes on packages and cartons in the backroom. You can even collect data from IDs and travel documents using Optical Character Recognition (OCR), or parse driver's license information for age verification, returns monitoring, loyalty and credit card applications. The result? Superior value. You can deploy a single scanner family for virtually every scanning need across our store.

Count on Zebra performance to keep your lines moving

Zebra's DS4308 set the bar for decode range, and you can count on the same "can't miss" range from the DS4608. The DS4608-SR can capture UPC codes up to 28 inches away, enabling checkout associates to easily reach items in a customer's shopping cart without leaving the cashwrap. The 800 MHz microprocessor, high-resolution megapixel sensor and Zebra's exclusive PRZM Intelligent Imaging technology provide instant barcode capture on even the most challenging barcodes. And a patented rear engine design enables the DS4608 to read wider barcodes at every distance, compared to other scanners with a similar field of view. As a result, associates can focus on your customers, rather than positioning items.

Day-in, day-out dependability

The DS4608 is engineered for durability, inside and out. IP52 sealing protects against spills, while a patented double-sealed optical system guards the critical optical components from dust and liquid—ensuring that the 'eye' of the scanner always captures the sharpest possible barcode image for fast and reliable decoding. The recessed scan window protects against smudges, dirt and scratches, which can impact performance. And the scanner is built to survive multiple 6 ft./1.8 m drops to concrete and 2,000 tumbles in our punishing tumble test.

On-the-fly switching between handheld and hands-free scanning

Simply place the scanner in the optional presentation stand to automatically switch to hands-free mode; then pick up the scanner for handheld mode—no change of settings is required.

Flexible feedback modes that work for any retail environment

The DS4608 offers multiple feedback modes including a good decode LED that's visible from any position, a traditional beep tone with adjustable volume/frequency, and Zebra's Direct Decode Indicator that projects the illumination on the barcode for instant visual confirmation of a successful scan.
